ABSTRACT. It is widely recognized that pharmacokinetic optimization needs to be addressed early in drug discovery to reduce the high failure rate in bringing drugs to market.

The importance of metabolism in drug design - SciELO

Metabolism is a critical factor in drug design, affecting the pharmacokinetics and pharmacodynamics of a drug. The study of metabolism is essential for understanding the fate of a drug in the body and for optimizing its design. The importance of metabolism in drug design is highlighted in the following text:
